The fee is invoiced in monthly arrears during the whole maturity period of the instrument. The fee is charged on the average monthly issued nominal value per ISIN. For non-euro currency issued instruments, the currency exchange to euros for invoicing purposes is applied at the instrument (ISIN) level at the end of invoicing period.

This example shows how to calculate the issuance monthly fee if the average monthly issued amount of ISIN is 13,5 million euros:
 $75\text{EUR} + (13,500,000 - 10,000,001) * 0.003\% / 12 = 83.75\text{EUR}$
