User administration	63-001	2,500.00	Administration of user authorisation by Euroclear Sweden

Custody Fees

Custody fees are charged for securities held in your securities account(s) and comprise notary services, asset-servicing and central maintenance services.

Notary service fee

Notary service is the initial recording of securities carried out by Euroclear Sweden as Issuer CSD¹. Notary service fees are based on the monthly average depot value of securities held in all securities accounts.

Asset servicing fee

Asset servicing fees are based on the monthly average depot value of securities held in all securities accounts. Asset servicing includes the provision of custody services other than notary services and central maintenance services.

Central maintenance service fee

Central maintenance service is the provision and maintenance of securities accounts at the top tier level carried out by Euroclear Sweden as Issuer CSD. Central maintenance service fees are based on the monthly average depot value of securities held in all securities accounts.

Custody fees are calculated as follows:

1. The depot is the market value for equity instruments and the nominal value for fixed-income securities
2. The Participant's average monthly holding is calculated based on (i) the Participant's holdings on each day (calculated at the close of the operational day); and (ii) the number of business days in the month.

Fees are expressed in basis points per year (1 basis points equals 0.01%). For securities denominated in a currency other than SEK, the market value is multiplied by the end-of-month foreign exchange rate.

¹ Reference in this brochure to an Issuer CSD means a central securities depository which provides the core service referred to in point 1 or 2 of Section A of the Annex to Regulation (EU) No 909/2014 in relation to a securities issue.

Clearing AM sub-market (Equity and fixed income market)

Clearing and settlement at Euroclear Sweden is divided into two sub-markets: the AM sub-market, which mainly handles equities, and the PM sub-market, which is the fixed-income market.

A trade on the AM sub-market consists of two settlement instructions on each side. Either a withdrawal from a VPC account and a delivery to the counterparty, or a receive instruction and then a deposit into a VPC account.

Fee	Code	Fee/SEK	Description
<i>Deposit/withdrawal</i> - entered before 12.00 noon on S	53-021	1.00	Registration of a deposit or withdrawal instruction. Before the delivery of securities, they have to be withdrawn from a VPC account, and vice versa with receive instructions. After the securities are received, they have to be deposited into a VPC account. In order for the settlement process to work as smoothly as possible, there are incentives for the participants to register their deposits and withdrawals as early as possible. Deposits and withdrawals registered in time, i.e. before 12.00 noon on settlement date, have the normal fee of SEK 1.00.
- entered after 12.00 noon on S	53-024	5.10	Registration of a deposit or withdrawal instruction. (See article 53-021 above.) In order for the settlement process to work as smoothly as possible, there are incentives for the participants to register their deposits and withdrawals as early as possible. If a deposit or withdrawal is registered after 12.00 noon on settlement date, there is a higher fee than if it is registered before 12.00 noon.
<i>Receipts/delivery</i> - entered before 12.00 noon on S-1	53-011	1.70	Registration of a receive or delivery instruction. In order for the settlement process to work as smoothly as possible, there are incentives for the participants to register their instructions as early as possible. Receive and delivery instructions registered in time, i.e. before 12.00 noon on S-1 (i.e. T+1), have the normal fee of SEK 1.70.
- entered after 12.00 noon on S-1	53-012	5.00	Registration of a receive or delivery transaction. In order for the settlement process to work as smoothly as possible, there are incentives for the participants to register their instructions as early as possible. Because of this, receive and delivery instructions (without event code) registered late, i.e. after 12.00 noon on S-1 (T+1) receive a higher fee than if they are instructed in time.
Cancellation	53-022	0.90	To cancel matched instructions, both parties are required to agree to cancel their respective instructions. In the VPC system, it is possible to cancel an instruction that has been settled earlier the same day, given that both parties agree. The cancellation is made through the registration of a new instruction with reference to the original instruction. Furthermore, both the securities and the settlement headroom must be available in order for the cancellation of an instruction against payment to be accepted (if it has been settled).
Not settled instruction	53-031	10.00	If an instruction does not settle at the last settlement occasion of the day, it becomes "not settled." The last settlement with payment is at 2 pm and without

			payment at 5 pm. It is only the delivering party that is debited for the non-settled instructions. It applies both for ordinary delivering instructions and pre-match delivering instructions.
Not settled Pre-match instruction	53-032	1,500.00	If an instruction does not settle at the last settlement occasion of the day, it becomes "not settled". It is only the delivering party that is debited for the non-settled instructions. CCPs are exempt of this fee.
Pre-matching, receipt/delivery	53-015	2.50	Market rules, as drawn up by the Swedish Securities Dealers Association, stipulate that certain instruction should be pre-matched. Pre-match instructions are handled in Euroclear Sweden's pre-match system where matching attempts begin as soon as the instructions have been registered. On day S (Settlement date), the matched instructions pass over automatically to the clearing and settlement system, whereupon the instructions are checked for delivery and payment capacity (pre-settlement checking). In the event that the instructions are not settled on day S, the instructions revert to the pre-match system and are tried again for settlement on the following settlement day. This process is repeated for a period of 20 days, unless the instructions have been settled. Instructions in the pre-matching system are not binding and can be unilaterally revoked as long as they have not been transferred to the clearing and settlement system.
Account Transfer -between VPC accounts or between PM accounts	56-011	2.40	A transfer between VPC accounts is basically one withdrawal from one VPC account and a deposit in another, but both instructions are paid by the instructing participant which is done by just one instruction in the VPC system. Account transfer between PM accounts is also done by just one instruction in the VPC system.
- not settled instruction	56-031	10.00	Not settled transfers are carried out and priced the same as not settled instructions of deliveries. (See article 53-031 above.)
Contravention of the rules and regulations in force	53-041	50,000.00	If a customer breaks the Euroclear Sweden rules and regulations in force there may be a fine.

Clearing PM sub-market (Institutional fixed income market)

Clearing and settlement at Euroclear Sweden is divided into two sub-markets: the AM sub-market, which mainly handles equities, and the PM sub-market, which is the fixed income market.

Every trade on the PM sub-market consists of one instruction on each side. One sell instruction and one purchase instruction.

Fee	Code	Fee/SEK	Description
<i>Purchase/sale</i>			
- reg. with payment before 12.00 noon on S	59-011	1.70	Registration of a purchase or sell instruction with payment. In order for the settlement process to work as smoothly as possible, there are incentives for the participants to register their purchase or sale as early as possible. Purchases and sales registered in time, i.e. before 12.00 noon on settlement date, have the normal fee of SEK 1.70.
- reg. with payment after 12.00 noon on S	59-016	5.00	Registration of a purchase or sell instruction with payment. In order for the settlement process to work as smoothly as possible, there are incentives for the participants to register their purchase or sale as early as possible. Purchases and sales registered late have a higher fee than if they had been registered in time. Purchases and sales registered after 12.00 noon on S have the fee of SEK 5.00.
- registration without payment	59-017	1.70	Registrations of sales and purchases without payment always have the same price regardless of registration time.
Transfer between PM accounts			A transfer between two PM accounts is priced as transfers between regular VPC accounts. See Account transfer 56-011 under "Clearing AM sub-market".
Provisional registration	59-010	2.00	Registration of instructions can be made without being approved for settlement. This is called provisional registration.
Cancellation	59-021	0.90	To cancel matched instructions, both parties are required to agree to cancel their respective instructions. In the VPC system, it is possible to cancel an instruction that has been settled earlier the same day, given that both parties agree. The cancellation is made through the registration of a new instruction with reference to the original instruction. Furthermore, both the securities and the settlement headroom must be available in order for the cancellation of an instruction against payment to be accepted (if it has been settled).
Not settled instruction	59-031	3.60	If an instruction does not settle at the last settlement occasion of the day, it becomes "not settled." The last settlement with payment is at 2 pm and without payment at 5 pm.
Contravention of the rules and regulations in force	59-033	50,000.00	If a customer breaks the Euroclear Sweden rules and regulations, there may be a fine. Specifically, if the participant has a remaining negative position (short position) in a repo-marked security (i.e. a security that the customer is obliged not to be short in at this time) at the last settlement with payment (at 2 pm on S).

RTGS/Real Time Gross Settlement

Real Time Gross Settlement (RTGS), makes it possible for instructions to be settled in real time during the settlement day. Matched RTGS instructions against payment are settled after a check of the securities holdings and of the funds reserved in RIX for the instruction in question. RTGS instructions free of payment are settled after a check of the securities holdings. RTGS instructions are settled, instruction by instruction, continuously during the day in both SEK and EUR for all securities. RTGS instructions may be settled from 7 am up to 5 pm.

Fee	Code	Fee/SEK	Description
<i>Registration</i>			
- with payment	57-012	20.00	Registration of RTGS instruction with payment.
- without payment	57-011	7.20	Registration of RTGS instruction without payment.

Payment administration

Payment administration concerns administration regarding payment and liquidity, deposits and withdrawals to and from liquidity settlement accounts, registration of limits, etc.

Fee	Code	Fee/SEK	Description
Deposit, Liquidity Settlement Account	58-406	1.50	Liquidity Settlement Accounts (LSA) are payment accounts for securities settlement within the VPC system, administrated by Euroclear Sweden. A balance on LSA constitutes a holding of central bank money, i.e. a claim on a Central bank. A deposit into an LSA is made by a SWIFT message (MT202). SWIFT fee excluded (Euroclear Sweden will invoice actual cost).
Withdrawal, Liquidity Settlement Account	58-400	5.00	Liquidity Settlement Accounts (LSA) are payment accounts for securities settlement within the VPC system, administrated by Euroclear Sweden. A balance on LSA constitutes a holding of central bank money, i.e. a claim on a Central bank. A withdrawal from an LSA is made by transactions in the VPC system. SWIFT fee included.
Transfer between Liquidity Settlement Accounts	58-404	3.00	There are Liquidity Settlement Accounts for each sub-market (AM and PM) and each currency (SEK and EUR). Liquidity can be transferred between the two sub-markets in the respective currencies (but not between different currencies) for a participant.
Manual repayment of credit	58-405	3.00	In the PM sub-market of the VPC system, Settlement Banks are able to utilize the functionality for automatic pledge of securities to obtain intraday credit from the Central bank. This credit should be repaid at 3 pm at the latest. This is done automatically if there are sufficient funds in the Liquidity Settlement Account. Otherwise this has to be done manually.
Registration of limit	58-407	1.50	The limit for a Clearing Member is registered by the Settlement Bank and constitutes the maximum payment obligation that the Settlement Bank will accept for the Clearing Member. The limit for a CID or a PM account group is registered by the Clearing Member.
Increase/reduction of Settlement Headroom on Cash Memorandum Account (CMA)	58-408	1.50	The Settlement Headroom in a cash memorandum account (on the Clearing Member and Clearing Member Identity level) consists of a limit, increase/reduction of Settlement Headroom, the net payments of settled instructions and the net payments of instructions marked "ready to settle". The function is used to directly increase or reduce the Settlement Headroom on the CMA.
